PROFILE SUMMARY

Computer Science undergraduate with hands-on experience in MERN stack and ML-based applications, focused on secure RESTful services, scalable, data-driven web systems.

SKILLS

Programming: Java, Python , JavaScript, SQL, C, C++
Tech Stack: React.js, HTML5, CSS3, Tailwind CSS, Express.js, MongoDB, Node.js, ML
Tools & Platforms: Git, GitHub, Postman, Figma, MongoDB Atlas
Core CS: DSA, OOP
Soft Skills: Problem Solving, Adaptability, Clear Communication
Certification: FIU Ideathon 2025, Finalist

PROJECTS

TRIP BOOKING & PAYMENT PLATFORM

React.js – Express.js – MongoDB | *2025–2026*
GitHub: thanusha-stack/Trip_Booking_Mern_Website

- Engineered a secure, end-to-end trip booking and payment system using the MERN stack.
- Implemented RESTful APIs for user authentication, bookings, and transaction workflows.
- Designed scalable database schemas and ensured seamless frontend–backend integration.

Next Steps: Integrating API-level security enhancements, audit logging, and automated testing.

FREELANCER RECRUITMENT PLATFORM

React.js – Express.js – MongoDB | *2024*
GitHub: https://github.com/thanusha-stack/Freelancer-Website

- Developed a recruitment platform enabling freelancer–client interactions.
- Implemented role-based authentication and authorization workflows.
- Designed modular APIs for job postings, applications, and user management.

Next Steps: Improving authorization controls, request monitoring, and secure activity logging.

ML-BASED WATER POTABILITY PREDICTION SYSTEM

Python – Flask – Machine Learning – Leaflet.js | *2025*
GitHub: https://github.com/thanusha-stack/water_quality_prediction

- Built predictive models to assess water quality using physicochemical parameters.
- Deployed models through Flask APIs for real-time prediction access.
- Integrated geospatial visualization for region-wise water quality insights.

Next Steps: Securing model inference APIs and adding data integrity validation.

MAP-BASED NEWS RETRIEVAL SYSTEM

React.js – Node.js – PostgreSQL – API | *2025*
GitHub: https://github.com/thanusha-stack/Map_based_News_Retrieval_System

- Developed a location-aware platform to deliver real-time regional news.
- Integrated third-party APIs and visualized content using interactive maps.
- Designed backend services for efficient data retrieval and filtering.

Next Steps: Implementing API rate limiting, error handling, and data validation.

EDUCATION

Bachelor of Engineering(Computer Science and Engineering) SATHYAMANGALAM, BANNARI AMMAN INSTITUTE OF TECHNOLOGY 2023-2027 ● CGPA: 8.17 (up to 5th SEM).

12th Grade at Sowdambikaa Matriculation Girls Higher Secondary School, Trichy 2022-2023 ● Prevailed an aggregate of 91.33%

11th Grade at Sowdambikaa Matriculation Girls Higher Secondary School, Trichy 2021-2022 ● Prevailed an aggregate of 90.83%
